

# PIANI-3- MKH8030 - 2x MKH8040

check from time to time  
that the cable forms a loop  
above the isolator

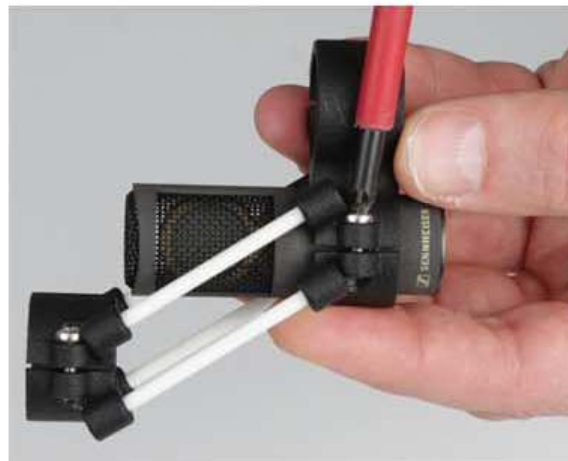

# PIANI-3- MKH8030 - 2x MKH8040

## Microphones installation

First install MKH8030 in the DMS clip, then the fig 8 and rear MKH8040.  
Adjust the coincidence of the two MKH8040 with the MKH8030  
and secure with the screws M3x10 (cross recessed pan head screws with type Z)

## storage and tips

If you have to leave the microphones in the windshield, be sure to store the PIANISSIMO upside down (but not on its side), this helps to stretch the isolators while preserving their shape.

During transport :

you can use materials such as foam or a thick cloth to keep the microphones in the right position and protect them from shock.
